ABOUT US

Anaura, the latest innovation from Rudra Ecovation, is a remarkable embodiment of eco-conscious fashion products that seamlessly blend sustainability and style. We transform post-consumer PET bottles into essential fashion products to further our commitment to reducing the environmental impact of the fashion industry.

One key highlight of our commitment to sustainability is our emphasis on end-to-end traceability. This ensures that in the journey of our products, from the origin of the materials to their final creation, every step of the process is accounted for. The transparency in the supply chain is to enhance trust and allow customers to make informed choices, aligned with their values.

With a daily production output of 320,000 square metres, our scale of operation makes sustainable fashion accessible to a broader market of customers. This mass production of eco-friendly materials contributes to making responsible choices more mainstream and impactful.

The emphasis on creating skin-friendly, flexible, and durable materials reflects our dedication to providing not only sustainable but also comfortable and long-lasting fashion products. This commitment aligns with the growing consumer demand for products that not only look good but also feel good and stand the test of time.

The adoption of dope-dyeing and pre-colored fibre is a practice undertaken to eliminate conventional wet dyeing processes. This not only enhances the efficiency of the production process but also leads to substantial savings in water, chemicals, and energy.

Our products' vision goes beyond merely creating eco-friendly versatile wearable materials. In positioning itself as a leader in responsible fashion, Anaura emphasises that sustainability is not just a trend but a transformative ethos. By seamlessly blending environmental consciousness with creative expression, Anaura sets out to inspire others to follow suit, and contribute to a more sustainable and ethical future.

MISSION

Our mission is to replace unsustainable fabrics in the market with premium, recycled, eco-friendly alternatives that keep the integrity of our planet intact. To provide materials that are not just aesthetically beautiful but also inherently responsible in their creation, while being soft, silky, and breathable. By leveraging our in-house, recycled spun and filament yarn, we reduce reliance on external resources, contributing to a more sustainable supply chain as well. The innovative machinery techniques applied during production ensure a product of superior quality, longevity, and a reduced environmental footprint.

VISION

Our vision is to make each Anaura offering reflect a harmonious fusion of style and nature, where sustainability is not just a feature but a guiding principle. Anaura products not only offer a satisfying visual and tactile experience but also communicate a narrative of thoughtful consumption, contributing to a more eco-conscious future, in the diverse realm of fashion.

GREEN ENVIRONMENTAL IMPACT

- Resource Conservation through Plastic Recycling
- Promote Energy Saving
- Waste Reduction and Circular Economy Impact
- Lower Greenhouse Gas Emissions in Recycling Process
- Water Conservation in PET Bottle to Fiber Transformation
- Contributing to Climate Change Mitigation

SPRING COLLECTION

Celebrate the rejuvenation of spring with our enchanting assortment of Anaura **tai**lor-made for the spring season. Embracing the spirit of renewal, our spring textiles effortlessly blend **lightness and vibrancy**. Remaining fresh while on the move presents a challenge that requires constant composure and the support of reliable apparel. Anaura spring fabric utilizes advance technology, imbuing it with inherent antimicrobial properties that hinder bacterial growth and minimize unpleasant odors. This feature ensures wearers stay healthy and fresh throughout the day.

In situations involving high activity, adverse weather, or prolonged usage, garments tend to accumulate sweat but even then Anaura spring fabric reduces the need for frequent washing, preserving the garment's longevity and aesthetic appeal over an extended period. Elevate your style with our spring Anauras, designed to add a touch of elegance to the **blooming** ambiance of the season.
